

- ◎ The Policia de Transito looked to upgrade and replace their old phone system.
- ◎ Required a large capacity system with E1/T1 connections as well as interconnection with third party systems.
- ◎ Epygi's feature-rich offerings separated them from the competition.
- ◎ The QX1000, paired with a Quadro M E1/T1 60 dual, met and exceeded all requirements.

## Epygi Receives the Green Light from the Policia de Transito

Direccion General de Policia de Transito de Costa Rica sought to install a new phone system in Barrio Carit, San Jose. The Policia de Transito is charged with enforcing traffic laws in Costa Rica, and needed a system that had ample capacity, provided E1/T1 connections and allowed for interconnection with other systems.

Prior to Epygi's installation, the Policia de Transito was utilizing a Panasonic KX-TD1232. When shopping with competitors, Epygi stood out above the rest not only for their ability to meet the capacity needs, systems interconnection

and E1/T1 connections, but for added features such as video calling and video conferencing. These features, and more, were available at a price point that others could not match.

When the time came to replace their Panasonic KX-TD1232, the Policia de Transito explored several companies but chose Epygi. Through the installation of a QX1000 and Quadro M E1/T1 60 dual, Epygi was able to meet and exceed their requirements, all at an attainable price point.
